PRODUCTS

# Paverplast

Is a Paverpol additive that can change Paverpol into plaster. This plaster is fully water-tight and weather resistant. Paverplast Plaster can be used to make permanently water resistant outdoor projects such as bird baths, fountains, and ponds. It will also give styrofoam, papier mâché, selfhardening clay, and more a waterproof coating. As well, it mixes with Art Stone, Paversand, Pavercolor, and more flawlessly, creating infinite possibilities for your sculpture or decor. Paverplast is available in 100 gram and 400 gram pots.

# Pavercolor

---

Is a vivid pigment powder that both mixes beautifully with Paverpol and with over Pavercolors! Combined with Paverpol Transparent, you can mix any custom color you desire. When white textile is soaked in this Paverpol mixture, it will take on the beautiful color and make your statues and decor shine! We stock Paverpol in 21 colors: Antique Gold, Black, Blue, Blue Jeans, Brick Red (Stone Red), Bronze, Brown, Copper, Dark Green, Gold, Green, Light Blue, Mother of Pearl, Rust, Sea Blue (Bleu de Mer/Sea Blue), Sienna, Silver, Violet, White, Yellow, Yellow Ochre.

# Art Stone

Is a unique textural additive to use for your Paverpol projects. Not only can you sprinkle the powder onto wet Paverpol to give statues a stone-like appearance, it can be mixed with Paverpol to create a beautiful, delicate self-hardening clay. It combines beautifully with Pavercolor, Paverplast, and Paversand to unlock even more textural possibilities! Art Stone is available in pots of 300 and 12500 grams.

# Paverpol Wrappers

Are stretchable cloth pieces with tons of possibilities and uses! They are the ideal product for fleshing out wire frames for statues and sculptures, creating a smooth solid base to see your idea come to life! As well, they can be used to decorate your Paverpol sculpture or decoration, providing unique drape, texture, and more in one versatile piece of cloth! Try using them to make clothing for statuettes such as hats and scarves. There are 100 10 cm x 10 cm wrappers in each box.

# Josefine Varnish

Is a high quality outdoor varnish that will protect your piece no matter the setting! It protects paint from weather-rain or shine! Keep your pieces looking as beautiful as when you first made them with this beautiful varnish. Josefine Varnish is extremely user-friendly and cleans up in a snap. All it takes is water and a little soft soap. Josefine Varnish is available in 3 beautiful finishes, High Gloss, Satin, and Matte, and in 2 sizes, 100 ml and 375 ml.

# Paverscrub

Is decorative colored flakes with endless possible uses! Give these colorful flakes a try on your next Paverpol project. Paverscrub comes in 45 gram pots in various colors. We stock Terracotta, Granite, and Green

# Paverpol Sculpting Medium

Is an environmentally-friendly textile hardener, offering you endless possibilities to shape your creativity. Developed by Dutch artists, it is a user friendly replacement for resin. Paverpol dries quickly, but slowly enough to allow for plenty of open working time. It adheres to almost all materials (except plastic) and unlike most hardeners, it doesn't deteriorate polystyrene foam. Despite this, it easily washes off your hands and tools with warm water. Best of all, it is the first product of its kind to have earned the AP seal, which means it's suitable for artists of all ages! Finished projects become hardened with no additional products required. It is suitable for indoor and outdoor use, though for outdoor use we recommend a coat of outdoor varnish. Varnish is especially recommended if your piece is painted with acrylic paints or will be in a high-humidity area. This will keep your piece beautiful and help you avoid mildew and decay. Paverpol comes in 6 colors: Transparent, White, Black, Lead Grey, Bronze, and Peach. It comes in a variety of sizes, giving you great options for any project. It can be purchased in 500 gram, 1000 gram, and 5000/5750 gram pots and buckets. Paverpol Transparent and Bronze is also available in a 250 ml bottle with a dropper. This is especially useful for fine work, such as waterproof bonding of beads for necklaces and earrings. The bottles are also ideal for scrapbooking and gluing doll clothes.

# Paversand

Is a texture additive medium for sculpting projects. While it isn't actually sand, when combined with Art Stone and Paverplast it transforms your project. Use it to create incredible 3D effects like deep cracks, fissures, and crevices on canvas, figures, wood, glass, metal, pottery, sturdy cardboard, and more! The more you add, the coarser the structure and the more unique textures you can find! Paversand comes in 1000 g containers. Available in two colors/finishes: White Paversand results in a stone-hard finish, while Black Paversand results in a coarse finish.

# Josefine's Relief Decoration

Is a beautiful decorative dried birch bark. As soon as Paverpol is applied to it, it becomes flexible, offering endless decoration possibilities! Use it to create beautiful textures in your Paverpol sculptures or decor, or even apply it to canvas or another surface for amazing texture in your creative works. Relief Decoration is approximately 30 x 50 cm, packed in a bag.

# Stockinette

Stretchy and with an open-weave knit, Paverpol Stockinette is an amazing addition to your next project. It makes beautiful clothes for figures, a beautiful decoration, and can create unique surface designs and textures for your piece. With a delicate drape and unique texture, Stockinette has endless possibilities for your Paverpol artworks and decorations. Stockinette is made of 100% cotton, package contains a 80 x 100 cm piece of fabric. (Approximately 1 yard)
